## Appendix 2-A

## Integer War

The cards found above need to be printed and cut out. You will need about 7 sets for your class. Three sets of identical instructions are shown below. They can be printed and cut out so each group that plays will have a set of instructions.

### Integer War

# of players: 2 to 4

To play: Players each draw 2 cards and add the two numbers. The player with the largest answer collects all cards. In the event of a tie each player keeps one card and selects another and finds the new sum. The discarded card goes to the bottom of the deck. Play ends when there aren't enough cards left for each person to select 2 cards.

Player with the most cards wins.

### Integer War

# of players: 2 to 4

To play: Players each draw 2 cards and add the two numbers. The player with the largest answer collects all cards. In the event of a tie each player keeps one card and selects another and finds the new sum. The discarded card goes to the bottom of the deck. Play ends when there aren't enough cards left for each person to select 2 cards.

Player with the most cards wins.
