Percent War

of players: 2 to 4

To play: Players each draw 2 cards, one from each pile, and find ___% of ____ . The player with the largest answer collects all cards. In the event of a tie each player keeps one card and selects another and finds the new product. The discarded card goes to the bottom of the deck. Play ends when there isn't enough cards left for each person to select 2 cards.

Player with the most cards wins.
