

1. Daisy wants new flooring and carpeting for her rectangular apartment. A floor plan of her apartment is shown above.

A) How much flooring does Daisy need for her bathroom?

B) If bathroom flooring costs \$12.95 per square meter, how much will it cost Daisy to put new flooring on her bathroom?

C) How much carpeting does Daisy need for her bedroom and living room?

D) Daisy has \$700 to spend on carpet in her living room and bedroom. Carpet costs \$9.98 a square meter. Does Daisy have enough money to carpet the two rooms?
