Government of Newfoundland and Labrador. (1993). *Forestry Module Biology 3201, Teacher's Manual*. Department of Education, Division of Program Development. Prepared for the department by Susan J. Meades.

Nelson Science 10 is the approved resource for Science 1206. It is, however, recommended that teachers obtain a copy of either the Fisheries Elective Unit or Forestry Elective Unit to augment Unit 1: Ecosystems.

Science 1206 is a course containing one unit from each of the pure sciences (i.e., biology, chemistry, geology and physics). It is recommended, therefore, when required, teachers use the approved resources for Biology 2201/3201, Chemistry 2202/3202, Earth Systems 3209 and Physics 2204/3204 as support material.
